common uses.

sore
muscles.

joint
pain.

sprains
& strains.

mobility.

5 star rating ★★★★★ 100+ reviews.

such an amazing blend of ingredients that WORK.
i use for a pre-race and post-race quad massage.

best i have found for horrible arthritis in my hands and feet.
worth every penny

had severe knee pain that nothing would touch. pain dramatically reduced
after two applications of the deep tissue. completely sold on this product.

gives me relief from lower back within minutes after applying.
best pain reliever i've ever used and i've used so many.

how to use.

massage 3-4 pea sizes of deep tissue into affected areas. use as needed.

when to pair with a sublingual cbd.

for chronic pain and inflammation like arthritis, we recommend to include the sublingual cbd into your daily routine to manage internal baseline inflammation levels. this will help reduce the frequency and intensity of flare ups. the deep tissue is used alongside the sublingual cbd to address the pain and inflammation in specific areas when flare ups occur.
